

## ABSTRACTS

**Bokareva G., Bokarev M.**

### ***The problems of practical pedagogy***

*The article keeps on revealing the author's speculations in frames of the methodology of pedagogical research regarding the predictive practice in the complex "lycée - higher educational institution" as a source of a modern pedagogical theory.*

Keywords: "school within a higher educational institution", continuous industry oriented educational complex "lycée - higher educational institution", differential-integral approach, culture of creativity.

**Konyushenko S. Kuzmin S.**

### ***The process model of formation of didactic skills for use network of interactive learning tools***

*The article deals with issues related to the construction of a model of the formation of the students' future teachers didactic skills on the use of a network of interactive learning tools, describes the model and detail its component composition.*

Keywords: didactic skills; network of interactive learning tools

**Tamarskaya N.**

### ***Current guidelines in the professional development of teachers***

*We consider deterministic modernization of education in the modern landmarks of the teacher professional development, analyzed orientation training systems to new competence, certain professional teacher standard*

Keywords: modernization of education; system of teacher training; inclusive competence of the teacher; professional standard

**Grebenyuk T., Bulan I.**

### ***The concept of simulation training and methodological support design and research activity of students***

*The problem of educational-methodical support of students attracts more and more attention of scientists and practitioners. In pedagogical research the authors use various approaches to modeling of such support. However, the authors note that each type activity of students in the learning process requires both general and special rules for the organization of this or that type of activity. In the proposed article, the authors present their scientific positions with respect to modeling of educational-methodical support of design-research activities of students*

Keywords: project activity; research activity; design-research activity; educational-methodological support; modeling

**Tamarskaya N., Venzel R.**

### ***Features of formation of an inclusive university teacher competence***

*Substantiates the relevance of the system of professional development of the teaching staff for the implementation of inclusive education and the formation of an inclusive university teacher competence. The analysis of problems of formation of the inclusive competences and provides the university practice in the realization of the idea of inclusion*

Keywords: inclusive education; training of high school teachers; inclusive competence; the formation of the inclusive competences in the process of training of high school teachers

**Lifintsev D., Serykh A., Lifintseva A**

### ***Social support and identity's development: review of empirical studies***

*The article discusses the features of the social support's influence on the identity of adolescents*

Keywords: social support; identity; adolescents; family

**Mychko E., Krakovskaya M.**

***Preparation of the future pedagogists for building social space of pre-school children's relationships with the requirements of the professional and educational standards***

*The article deals with peculiarities of future pedagogists's preparation for building social space of pre-school children's relationships with the requirements of the professional standards of higher education and educational standard in the sphere of pre-school education.*

Keywords: preparation; readiness; future pedagogics; levels of the readiness

***Chuksina I., Zhao C.***

***Professionally oriented approach to teaching vocabulary on the lessons of Russian as a foreign language (on a material of texts on Maritime specialty).***

The article discusses the features of a professionally oriented approach to learning the professional vocabulary of the Russian language of foreign students. Offers exercises aimed at developing students' communicative skills and qualities right speech.

Keywords: professionally oriented approach to learning the professional vocabulary, the principle of communicative orientation, vocabulary, somatization of words

***Gerasimova A., Kirakosyan M., Skopich D.***

***Practice-oriented approach to formation of professional competence in the process of training bachelors in human resource management***

*The paper deals with the practice-oriented approach in the formation of professional competencies of bachelors of Human Resource Management*

Keywords: practice-oriented approach; professional competence; Federal State Educational Standard of the third generation

***Tarasova E.***

***Elective course "Oral professional speech teacher of Russian as a foreign language" as a way to implement cognitive competency training in pedagogical high school***

Oral professional speech - the most important component of pedagogical activity. Specificity of the oral professional speech teacher is that it is linked with the teaching process, there is on this basis, and with regard to him. Communication with the teacher trainees involves the exchange of information and experience, as well as the fulfillment of the set objectives; contact the teacher and the student on the psychological and emotional level. Oral speech teacher professional RCT is one of the important channels of communication between the cultural field of the foreign student and Russian culture. Designed elective course forms the professional competence of the future teacher of RCTs.

Keywords: cognitive training, professional oral speech teacher of Russian as a foreign language, purpose, objectives, the content of the elective course

***Samsonova N., Vrachinskaya T., Butkus E.***

***Historiography of the pedagogical heritage of V.N. Soroka-Rosinsky***

*The article is devoted to representation in the national historiography of the pedagogical heritage of V.N. Soroka-Rosinsky in line with the pedagogical conflictology. Highlights estimates contained in studies of contemporaries V.N. Soroka-Rosinsky, representatives of the official pedagogy and the latest research scientists analyzing his legacy in conflictological aspect*

Keywords: pedagogical conflictology; historiography; V.N. Soroka-Rosinsky; pedagogical legacy

***Altunina V., Skladneva A.***

***Educational projects as an innovative tool for improving educational activities***

*We consider the socio-economic background and statistically due to innovation in the modern system of education in Russia*

Keywords: pedagogical activity; improvement; educational projects; innovation; innovation process

***Gaten J.***

***Intercultural competence of university teachers in the work with foreign students from foreign countries***

*The article is devoted to the training of foreign students from abroad in the Russian-speaking universities. The necessity of formation of intercultural competence of teachers, which largely depends on the prestige of Russian higher education and to increase its competitiveness in the market of educational services. The author defines intercultural competence as an integrated set of knowledge and skills that lead to teacher experience in intercultural communication teaching, allowing to create a new model of multicultural interaction in the educational space of the university. The article disclosed in detail the structure of the intercultural competence of the teacher, which consists of cognitive, constructive, communicative, motivational-value and reflective components. Describes developed and tested on the basis of the Center for Engineering Education Institute of additional education National Research University Samara them. Academician SP Queen model of purposeful formation of intercultural competence of the teaching staff*

**Keywords:** internationalization of education; pedagogy; intercultural competence; multi-ethnic educational environment; professional development; foreign students

***Ermakovitch S.***

***Socio-psychological articulation of masculinity in different societies***

*The article is devoted to the problems of masculinity and gender types. There are provided various definitions and styles of masculinity, main studying paradigms and peculiarities of its socio-psychological articulation in different societies*

**Keywords:** gender; concept; masculinity; femininity; culture; articulation; dominance

***Toropov P.***

***Semantic space of "prosaically cooperation" concept and its implementation in Russian onomastic.***

The data show sufficient determination according to the phenomenon of social assistance and ideas about it in the adult part of the Russian sample. This revealed differences in understanding among the three age groups. Representations of foreign residents in general correspond to representations of the age group of Russians, however, have expressed prosocial orientation and relate to global challenges. Use of the term in onomastics confirms the findings*

**Keywords:** social activity; prosaically cooperation; semantic space; onomastic

***Karpov G.***

***Standard model of forming of competences in applied mechanics and way of its implementation.***

*In article it is offered merge of a magistracy and a postgraduate study what substantially will raise the level of competences of the specialist*

**Keywords:** bachelor; master; postgraduate study; competence; management

***Kovalishin P.***

***Formation of linguistic competence of experts-philologists in the study of paradigmatic "borders" of linguo-culturology***

*The paper considers the basic directions of research of linguistic view of the world which characterize the full content of linguo-culturology at present time. The study of these directions allows experts-philologists to expand approaches to the study of language material and consider it in additional aspects.*

**Keywords:** linguistic competence; language; philology experts

***Bokarev M., Bychkova O.***

***Psycho - pedagogical component content of additional professional programs in the direction of "Teacher of the educational organization" according to the professional requirements of the standard***

*It determines the specificity of psychological - pedagogical component content of training courses and professional development of teachers of educational institutions for additional professional education*

Keywords: psychological - pedagogical component, training programs; teacher training; professional standard

***Filchenkova I.***

***The basic ideas and approaches to involvement of high school teachers in innovative activity***

*The article presents the results of the analysis of scientific works on the definition of the main approaches to the involvement of teachers in innovative activities. Selected approaches (systemic, milieu, learner-centered, resource and synergy) provide the theoretical and methodological basis for the model to involve teachers in innovation, and provide the basis for further practical developments.*

Keywords: innovation activity; engagement; methodological approach

***Shakhov V.***

***Problems of regionality of russian exclave of south-eastern baltic***

*The processes of determination in the culture in the Kaliningrad exclave must be considered an integral part of the cultural strategy of the state. They depend on external and internal factors*

Keywords: culture; exclave; region; identity; tolerance; south-eastern Baltic

***Belaynina I., Elizarova N.***

***Relevant trends of training competitive specialists in the field of education***

*In the article the model of training based on the formation of competencies required of a specific profession and ensure high competitiveness, using the principle of dual training in the educational-industrial cluster of the University*

Keywords: scientific research; the principle of duality; competitiveness; educational-industrial cluster model

***Gerasimova A., Balaysnikova E.***

***Human resource manager status and problems of his adaptation at an enterprise***

*The paper is dedicated to the status and adaptation of a human resource manager. On the basis of the investigation the problems were identified and the measures aimed at improving the status of the manager in the organization and his/her adaptation were proposed .*

Keywords: personnel manager; adaptation; human resource manager status; decapitation

***Karpov G.***

***Professional theoretical model***

*It proposed a theoretical model of a professional based on the classical Bohr atomic model*

Keywords: professional; modeling; a theoretical model; competence

***Potmenskaya E.***

***The emotionally-reflexive approach as the conceptual formation basis of the musical culture of the future elementary school teacher in the process of the career education***

*The article reviewed the conceptual formation basis of the musical culture of the future elementary school teacher. The author describes the emotionally-reflexive approach in the formation of the musical culture and it should be based on the music specificity as the branch of art and its possibilities. The article analyses the scientists' researches in the field of the perceptual psychology of the music, the influence of the musical art to the left and the right cerebral hemispheres. The author proved that the realization of the emotionally-reflexive approach assumes the development in the future teachers the empathy, the tolerance, the musical creativeness. And the base is the musical and the theoretical analysis*

Keywords: musical culture; emotionally-reflexive approach; emotions; reflection(self analysis)

***Krukovich N., Derendyaeva T.***

***Using the methods of mathematical modeling in the professional training of specialists of the fishing fleet***

*The application of methods of mathematical modeling in solving the problem of choosing an effective strategy for fisheries in marine specialists training*

Keywords: math modeling; fishing; training marine specialists

***Korneva I.***

***The analysis of the educational potential of the students' preparation of high technical colleges to the development of physical research methods***

*The article describes learning of physical methods of investigation. The article analyzes the learning potential of engineering specialties students during teaching of physical methods of investigation. It is shown that the educational process meets a number of requirements: problematical, systematic, etc. The subject matter, which is the basis of such training should have problem character and to be associated with the chosen profession. It is noted that the use of modern methods of experimental physics problem solving promotes the degree of practice-oriented training of engineering specialties students.*

Keywords: educational potential; physical education; experimental methods

***Zhabrova T., Zaitsev A.***

***The results of experimental researches of the effectiveness of hypoxic training students living in unfavorable environmental areas***

*As a result of experimental researches was found that hypoxic training should be considered as one of the essential means of preventing violations of the respiratory system in areas with adverse environmental conditions.*

Keywords: hypoxic training; students; ecologically adverse factors

***Artemeva V.***

***Research of driver's attitudes to the ethical behavior***

*The results of the original study for drivers to comply with ethical norms of behavior on the roads presented in the paper. The differences in regards to the observance of moral standards in different areas are established. Drivers consider fraud "as immoral behavior, but the evasion of fines, the ability to negotiate with employees traffic police on good terms," for the respondents it is acceptable behavior. There is a difference in regards to compliance with drivers-professionals and "Amateurs." the more experienced, professional drivers to a lesser extent than the fans "likely to engage in risky driving. However, professionals are more inclined to deception and violations of economic regulations.*

Keywords: road safety; moral; moral norms and rules; the ratio of drivers to comply with ethical norms

***Mishchenko L. Senkova M.***

***Specificity of the integrative development of boys and girls of preschool children with a low level of development of imagination***

*The article offers a comparative mapping of structures of integral individuality of boys and girls with high and low level of imagination. From the position of the element and system analyses installed the backbone role of the imagination in the development of individuality preschoolers that harmonizes the development of the multi-level properties of their integral individuality*

Keywords: structures of the integrated individuality of preschoolers; boys and girls; imagination; integrative psychology; development of human individuality

***Derendyaeva T., Krukovich N.***

***To the problem of formation of professionally important qualities of marine engineers and their compliance with modern requirements of the profession and the labour market***

*The article considers the modern requirements to the profession of a marine engineer includes not only knowledge and skills but also professionally important qualities related to individual psychological characteristics of personality*

Keywords: professionally important qualities of marine engineers; innovation skills; socio-economic development of the region; core competence

***Vlasenko M., Samsonova N.***

***The competence of personal security soldier military security structure***

*The article systematized relevant aspects of military service safety in accordance with applicable legal a regulatory acts; identified approaches to the definition of personal safety and the competence of the soldier is proved expediency of its consideration by the concept of "risk".*

Keywords: safety of military service; personal security; personal safety; risks of military service

***Boguslavets M., Bavula J., Bavula A.***

***Means of new information technologies in the process of professional training of engineers of the NAVY***

*The article discusses the process of professional training of engineers of the Navy.*

*The authors focus on improving the educational material-technical base with the use of training facilities, and the optimization of teaching methods, with the possibility of formation of an individual trajectory of training of personnel at the University and on the ship.*

*The authors analyzed new information tools technologies used in the learning process, which allowed to the identification of classification training tools, as well as technical training.*

Keywords: the means of new information technologies; individual learning paths; training facilities; simulator

***Medynskiy V., BoguslavetsM., Bavula J., Bavula A.***

***Intensification of the learning process using a basic outline***

*The possibility of application of the basic outline for the intensification of educational process in a given discipline*

Keywords: basic outline; interaction; activity; reference signal; the channels of perception

***About results of a research of compliance of motivation and interest to type of the chosen profession of students of the bionomic directions***

*As a result of experimental studies, it is established that in the course of training in bionomic professions in the «people-nature» system, a subsystem of «people –animal», in the conditions of lack of special selection and traditional forms and ways of training, decrease (from a course to a course) motivation and interest in the chosen profession is observed. The percent of the students who aren't identifying themselves with the chosen profession increases.*

Keywords: motivation of learning; motivation of professional activity; professional identity

***Mavrenkova E.***

***Continuity in formation of common cultural competence of future teachers in the "college-university" system***

*This article discusses aspects of continuity of formation of common cultural competence system of continuous pedagogical professional education "college-university". The analysis of the continuity of the common and general cultural competences in vocational training of teachers in the system "college-university". The model of continuity of professional teacher training in pedagogical High school regional state budgetary educational institution of the Kaliningrad region "Pedagogical Institute" of higher education*

Keywords: continuity, the formation of common cultural competencies; system "college-high school"; the general competence; model of continuity

***Reznikova T.***

***To study the problem of motivation of professional education professionals to master the competencies in the training of documentary maintenance organization Own performance***

*The article considers the problem of motivation of professional education as a pedagogical problem, analyzes the state policy in the sphere of improving the quality of vocational education*

Keywords: professional education; dual education; the formation of the entrepreneurial mind; professional competence; Simulation Company

***Tkachenko S.***

***The competitiveness of the expert: the definition of the concept of scientific research***

*The article describes some of the approaches to the definition of «competitiveness of the expert», presented in current research in the field of economy, pedagogy and psychology. The author has tried to analyze the essential features of the concept of «competitive expert»*

Keywords: competitiveness, competitiveness of the expert; graduate competitiveness; student competitiveness
